

ECONO-CLOSURE

The econo-closure is a minimalistic TV enclosure that provides a low-cost solution to protect a TV from access and damage.

It is constructed of strong ABS plastic with an even stronger polycarbonate front panel. It's a simple slip case design. The frame is attached to the wall around the TV and the front case is slid over the frame and secured with screws.

The econo-closure does not have cooling fans. Ventilation is provided through the openings in the side panels.

It is designed for indoor use; outdoor use is at the discretion of the buyer. We do not warranty its life or water tightness.

The installed depth of the TV's and mounts should not exceed 5 1/4". The dimensions below are the outside dimensions; the inside is 1/4" smaller all around, the usable depth is less 3/4".

We offer the econo-closure in four size ranges.

24 & under	23" x 16" x 6"
26 -32	30.5" x 19.5" x 6"
36-42	39.5" x 24.5" x 6"
46-48	44.5" x 28" x 6"

The econo-closure is in stock ready to ship. Large quantities will take extra production time.

We can customize the enclosure with a *minimum purchase of 5 enclosures*. Customizations would be limited to adding 60mm fans, security screws, a full back panel, and a change of size.

For other features, we would refer you to our Standard TV Enclosures, which do not have a minimum buy quantity and is extremely customizable.
